

## RING SIZING GUIDE

*find your perfect fit*

Set your printer settings to 100% before printing this page in US letter size. After printing, place a credit card here to confirm the guide is scaled properly.

### MEASURE A RING

Choose a ring you own that perfectly fits the finger on which you plan to wear your new ring. Place it on the circles below until you find a circle where the black outline is just visible on the inside of your ring. Please note, unlike many jewelers, Kwiat offers rings in quarter sizes in addition to half sizes. If the ring you are placing on the circles seems to fall between half sizes, opt for a quarter size when ordering your ring. For example, if your ring is between a size 5.5 and 6, you should purchase a size 5.75 ring. Please note, these are US ring sizes.

### MEASURE YOUR FINGER WITH OUR FREE SIZE GAUGE

The circle method on the left should give you a good idea of your ring size, however the most accurate method is to measure your finger with a ring gauge, a set of plastic rings precisely calibrated to represent ring sizes from 0 to 13. We are pleased to mail you one for free—simply call 212.725.7777 or visit [Kwiat.com/ringsize](http://Kwiat.com/ringsize) to order one. Once you receive the gauge, here's how to use it.

Begin with a ring that's bigger than you think you need, then work your way down, one by one. When you reach a ring that feels right, make a note of its size. Then, try a half size smaller. If that feels too small, then go back up a half size to confirm which fits better. If you feel that one is too large and one is too small, then purchase the quarter size between the two sizes. For example, if size 6 feels too large and size 5.5 feels too small, purchase a size 5.75. For a demonstration, please view our video tutorial at [Kwiat.com/ringsize](http://Kwiat.com/ringsize). If you purchase a ring and find it needs a little adjustment, don't worry! We provide free ring sizing within 30 days of you receiving your order.

### TIPS FOR MEASURING

Make sure you measure the finger on the hand on which you intend to wear the ring.

Measure at room temperature—heat or cold can cause fingers to swell or shrink.

Exercising, salty food, alcohol, and water retention can also cause fingers to temporarily swell.

A ring should fit more snugly than you might imagine. It should not slip on and off with ease or you may lose it.

Rings with wide bands tend to fit more tightly than narrow rings.

WE ARE HERE TO HELP

Our concierge service can help with any other questions you have about finding your best fit. Please call us at 212.725.7777 or email [concierge@kwiat.com](mailto:concierge@kwiat.com).
